#### Saturday---The Last Day of the Record-Breaking Sale.

We shall make the greatest effort today-of course we shall expect the greatest response. And to the participants we promise the greatest satisfaction. Standing between two seasons—bringing into special offering the last of summer's needs and the first of fall's fancies under the chaperonage of our ambition's desire, that sinks thought of profit-and all consideration of cost-to the end of making the banner offering of a sale that has proven to be the banner sale of this store—this city.

### A Summary

The Good Effect of a Vanderbilt Spurt Short-Lived.

Irregularity and Uncertainty the Notable in All Divisions of the Market - The Volume of Trading Light-Money Conditions Improved.

NEW YORK, Sept. L-The irregularity and uncertainty that have characterized the dealings in stocks throughout the week were again noted in today's market. During the greater part of the day the general tone of the market was a sagging one with dealings very light in volume, particularly in the standard issues. Toward noon a very pronounced advance took place in the Vanderbilt group of stocks, which was, as is usually the case, effective in turning the rest of the market Expenses upward. When the advance in that quarter culminated the general market again relayed into the conditions prevaling carlier in the day. The advance in the Vanderbilt stocks, which attained really sensational proportions in Omaha and Calcago Northwestern, was without any specific explanation. As was to be expected, the familiar rumors of the amatigamation of these systems through the exchange of securities were revived, but apparently without any more warrant than there was without any more warrant than there was for the same reports early in the year. The difficulty, however, of accounting for the general level of these stocks without having recourse to such theories is mani-fest, and on this account the rumors attain credence whenever disseminated.

Notwithstanding the indications of a large decrease in the banks' reserves tomorrow, the money market was fairly easy all day and the only effect of the apprehensions in regard to the bank statement was to restrict activity pending the publication of the figures. The day was again practically bare of news. The London market was figures. The day was again practically bare of news. The London market was strong, and foreign houses were moderate strong, and foreign houses were moderate buyers on balance here today, the better tone there being again attributed to the hepes of a peaceful solution of the South African difficulty. Of the railroad earnings reported today the most important was the annual statement of the New York Central, wherein it was noted that the company earned in its past fiscal year about 55-8 per cent on its capital stock. Apart from the Vanderbilt group the firmest features of the market were Southern Railway preferred, the Hocking Valley issues, and Tennessee Coal and Iron. On the other hand, a rather sharp decline was the other hand, a rather sharp decline wu noted in Brooklyn Rapid Transit and Southern Pacific continued to reflect pro-nounced pressure. The especial weakness of Brooklyn Rapid Transit was without particular explanation, but the course of the stock was generally taken to reflect the extent to which the short interest was climinated on its recent advance.

the general rule, but as a whole the price of stocks declined rather heavily yester-day. Talk of yellow fever, a slight stiffening of the rate for call money and predictions that the bank statement would be poor helped the bears in an attack which, before the end of the day, proved to be more of a success than any recent bear raid. Prices declined fractionally only, in most cases, and there was some recovery before the close, but some long stock held by small margined people came out at times. Nothing serious in the way of further reaction is looked for by con-servative people. The bank statement is generally expected to be a poor one, showing a decrease in the reserve as large as that of last week. The interior has withdrawn \$2,000,000 or more from the New York banks during the week. The poor statement was discounted largely rester-day unsloubtedly, and unless it is much worse than is likely a recovery seems probworse than is likely a recovery seems prob-able when it appears. The yellow fever-this time is not a serious affair and prob-ably will not cause any further selling. Railroad carmings statements yesterday were all good, and that of the Pennsylvania was especially attractive. Other general news was all favorable. London bought 15,000 shares of Americans yesterday. Careful buying of stocks on any further Careful buying of stocks on any further weakness is advised. It is worthy of note that with September, the first of the autumn months, is ushered in a factor that may have a considerable effect on

The exceptions to the general rule of weakness were, perhaps, the most notable features of the market. There were several of them. The Vanderbilt issues were taken up actively, and some of them were pushed up in a remarkable way, Omaha and Northwest being the most buoyant. Omaha advanced from 117 to 125, and, although it was sold off from this level, closed at 122 with five points net gain for the day, Northwest was advanced from 155 to 158 7-8, and closed at 167. New York Central advanced to 140, but later lost nearly all of its gain, closing at 128 7-8. The talk of the Northwest-Omaha deal seemed to be the cause of the advance of these securities, inside buy

been disappointed over the first probably while the local hear element have been aggressive. Unless there is some very builtish news in the near future, values will probably work lower. Should December be forced under 70, which seems likely, it will create a very heavy short interest and bring in some investment buying.
